

4 WAYS DMC-HUB+DDM™

ALIGN WITH THE LATEST FDA DRAFT GUIDANCE FOR DATA MONITORING COMMITTEES

Ensuring Compliance with New FDA Guidelines

The **FDA's new draft guidance** underscores the critical role of DMCs in ensuring trial safety and efficacy through comprehensive procedures and practices. **DMC-HUB is precisely developed to meet these guidelines**, offering a unified platform that streamlines clinical trial processes and enhances compliance.

4 ways DMC-HUB+ DDM™ ensures trial safety and efficacy

1

UNIFIED SOLUTION

2

CENTRALIZED DOCUMENTS

3

SIMPLIFIED WORKFLOW

4

DYNAMIC DATA MONITORING
DDM™

1. Unified Solution

DMC-HUB consolidates all your **document and data management needs into a single, seamless platform**, virtually eliminating the complexity and costs associated with managing multiple tools.

2. Centralized Documents

Simplifies document access and sharing, ensuring that **all team members are always on the same page.**

3. Simplified Workflow

With features such as task management, data review, meeting management, and **embedded video conferencing**, DMC-HUB ensures that your team can collaborate efficiently and effectively.

4. Dynamic Data Monitoring DDM™

Our unique DDM™ technology provides **real-time insights** through innovative statistical methods, enabling your IDMC to:

- Dynamically monitor **safety and efficacy**
- Visualize longitudinal data
- Make informed decisions on early termination.
- Receive timely drug safety alerts.
