

DMC-HUB, powered by Dynamic Data Monitoring (DDM™), is a cutting-edge solution designed to provide your DMC with the tools and technology to fully align with the latest FDA draft guidance for Data Monitoring Committees (DMCs)

## DMC-HUB

## Dynamic Data Monitoring (DDM™)

Dynamic Data Monitoring (DDM™) dynamically monitors safety and efficacy while clearly displaying accumulative data on a “radar screen”. DDM™ enables users to perform simulations and generate data visualizations empowering the DMC to make informed recommendations on safety and efficacy.
